Morning activity

Aigua a casa

Water at home

Learning with autonomy and confidence, discovering the world with curiosisty, and being a part of the diversity around them.

3-5 years old

Description

The museum’s garden and workshop space are transformed into a very special home where the kids will play with the various domestic uses of water, discover its properties, and learn how to use it better. In addition, a brief visit to the museum’s exhibition will leave us amazed by the machines that, for the past hundred years, have been bringing water into our homes every day.
In small groups, we’ll explore the nooks and crannies of this fun house. In the kitchen, we’ll make refreshing beverages with water; in the bathroom, we'll lather up with soap and see where the grime goes; in the laundry room, we'll do the wash and try different ways to dry the clothes; and in the garden, water will become a truly original play element.

ACTIVITY GOALS

→ **Discover the different uses of water** through experimentation in a simulated house, in order to raise awareness of the importance of water in everyday life.

→ **Learn to be, think, and communicate**, based on observation and respect for the environment, and follow a chain of actions to achieve a goal, fostering a positive learning climate.

→ **Practice cooperation** with classmates as a means to achieve results and work as a team.

SDGs

Capacity: class group (25-30 students)
Duration: 120min
Schedule: 10h

Museu de les Aigües

ADDITIONAL RESOURCES

Through education, we want to move toward a more sustainable and environmentally respectful society that values the importance of water in our lives. For this reason, we invite you to continue learning about water with the museum's digital resources best suited for this age group:

Storyteller "La Pepa, la bassa i l'aigua"

Follow Pepa's adventures to discover the importance of water in the lives of all living beings, including us, and its presence in nature and in our lives. (Only in catalan)
