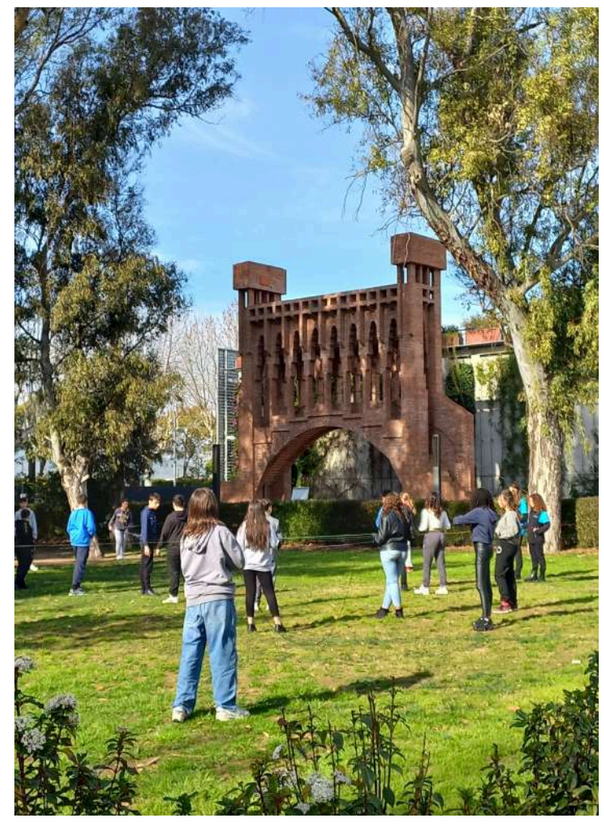
Canvi climàtic: present i futur

The water Factory

Biology, Geology and Education on Civil and Ethical values

11-16 years old



Description

Reflect on water distribution around the world. Has the amount of water changed as the years have gone by? Why is the water crisis a concept we hear so much about nowadays?

We will analyse the different causes and consequences of climate change to, ultimately, draw conclusions: does climate change affect everyone everywhere equally?

ACTIVITY GOALS

→ Understand **the consequences of climate change on the water cycle** and water availability.

→ **Present the socioeconomic impacts** resulting from water scarcity at an individual and collective level.

→ Share **what individual actions we can take** to be more resilient to climate change and the water crisis.

SDGs

Capacity: class group (25-30 students)

Duration: 90min

Schedule: 10h & 12h

Museu de les Aigües

ADDITIONAL RESOURCES

Through education, we want to move toward a more sustainable and environmentally respectful society that values the importance of water in our lives. For this reason, we invite you to continue learning about water with the museum's digital resources best suited for this age group:

Water: the driving force of the city

A four-episode documentary serie will show the challenges of managing the integrated water cycle, explained by people that participate in the process.
